Business Description

About D Music

D Music is an online music instrument retail store based in Jamaica, designed to serve musicians at every stage of their journey from first-time beginners picking up their instrument to seasoned professionals seeking premium gear. The store offers a curated catalog of guitars, bass guitars, keyboards, drum sets, and accessories, all available for purchase through a clean, easy-to-navigate web interface.

Logo

The D Music logo features a stylized electric guitar headstock above the wordmark "Dmusic". The bold "D" is set in white against a black background, followed by "music" in a lighter weight, creating a strong visual contrast that reflects the brand's professional and musical identity. The guitar silhouette reinforces the store's core product focus at a glance.

Slogan

“Everything you need to play, perform, and create.”

This slogan communicates the store’s breadth of offerings and its commitment to serving musicians across all disciplines and skill levels.

Mission Statement

To make quality musical instruments accessible to every musician in Jamaica and beyond, by providing a seamless online shopping experience, competitive pricing, and a thoughtfully curated product selection that caters to beginners and professionals alike.

Vision Statement

To become the leading online destination for musical instruments in the Caribbean, recognized for exceptional product range, customer service, and a genuine passion for music and creative expression.

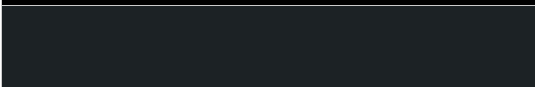

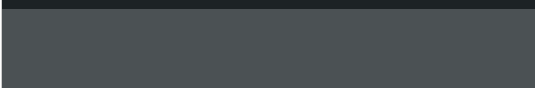

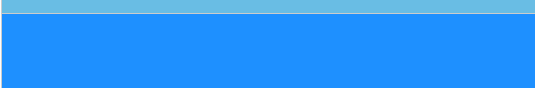

Core Values

- Passion for Music -We believe music enriches lives and we are committed to supporting those who create it.
- Accessibility -Great instruments should be within reach of every aspiring musician regardless of budget.
- Quality -Every product in our catalog is selected with care, prioritizing build quality and value for money.
- Simplicity -Our website is designed to be clean, fast, and easy to use for shoppers of all technical abilities.

Color Palette & Psychology of Color

Color Scheme

The D Music Store website uses a carefully considered palette of nine colours. Each was selected not only for visual harmony but also for the psychological messages it communicates to visitors.

Swatch	Name	Hex Code
	Primary	#D9D9D9
	White	#FFFFFF
	Black	#000000
	Dark Grey Azure	#1C2225
	Davy's Grey	#4B5154
	Brandon's Blue	#69BDE4
	DodgerBlue1	#1E90FF
	Jungle Green	#27AE60
	Scarlet Rose	#C0392B

Psychology of Color in Web Design

Color is one of the most powerful non-verbal communication tools in web design and marketing. Research shows that up to 90% of snap judgements about a product can be based on color alone (Singh, 2006). The palette chosen for D Music was deliberately assembled to balance authority, trust, energy, and creative identity.

Black (#000000) -Authority & Sophistication

Black is used as the dominant background color for the navigation bar, page banners, and checkout button. In marketing, black conveys luxury, authority, and timelessness. For a music store targeting both amateur and professional musicians, black signals that the brand takes its products seriously. It also provides the highest possible contrast for white text, supporting readability and accessibility (Elliot, 2015).

Primary Grey (#D9D9D9) -Neutrality & Balance

The primary grey is used for form backgrounds, button fills, and secondary UI elements. Grey is a neutral anchor that prevents visual fatigue, allowing the more vibrant accent colors to stand out without overwhelming the user. It communicates professionalism and restraint -important for a retail context where the product images should take centre stage (Heller, 2009).

Brandon's Blue (#69BDE4) & DodgerBlue1 (#1E90FF) -Trust & Creativity

Blue is consistently ranked as the world's most popular color and is strongly associated with trust, reliability, and calm (Labrecque & Milne, 2012). The two blue tones are used for primary interactive buttons (Sign In, Sign Up) and hover states. In the context of a music store, the lighter Brandon's Blue also carries creative and expressive connotations, aligning with the artistic nature of the target audience. The shift from light to darker DodgerBlue on hover reinforces affordance -signalling that a button is clickable and active.

Dark Grey Azure (#1C2225) -Depth & Professionalism

Used for the footer and deep backgrounds, this near-black dark grey adds depth to the layout without the starkness of pure black. It grounds the page and creates a sense of enclosure that subtly draws the user's attention upward to the main content area.

Jungle Green (#27AE60) -Success & Confirmation

Green is reserved exclusively for positive feedback messages -specifically the "Change due" confirmation on the checkout page when a customer enters a sufficient payment amount. Green universally signals "go" and "correct", making it ideal for success states. Using it sparingly ensures it retains its meaning and does not become visual noise (Elliot, 2015).

Scarlet Rose (#C0392B) -Warning & Urgency

Red is used exclusively for error and validation messages -shortfall warnings on the payment field and inline form errors. Red triggers an alerting response and immediately draws the user's eye to a problem that needs correcting. Like green, it is used sparingly so that its semantic meaning is preserved (Singh, 2006).

Storyboard

Typography

Typeface: Poppins

Weights in use: 400 (Regular) and 600 (Semi-bold)

Usage: Body text and UI elements throughout all pages

Poppins is a geometric sans-serif typeface that is clean, modern, and highly legible at all sizes. Its rounded letterforms give the interface a friendly, approachable quality while remaining professional enough for a commercial retail context.

Icons

Icons are sourced from the Remix Icon open-source library. The following sizes are in use across the site:

30×30px

24×24px

24×24px

24×24px

24×24px

24×24px

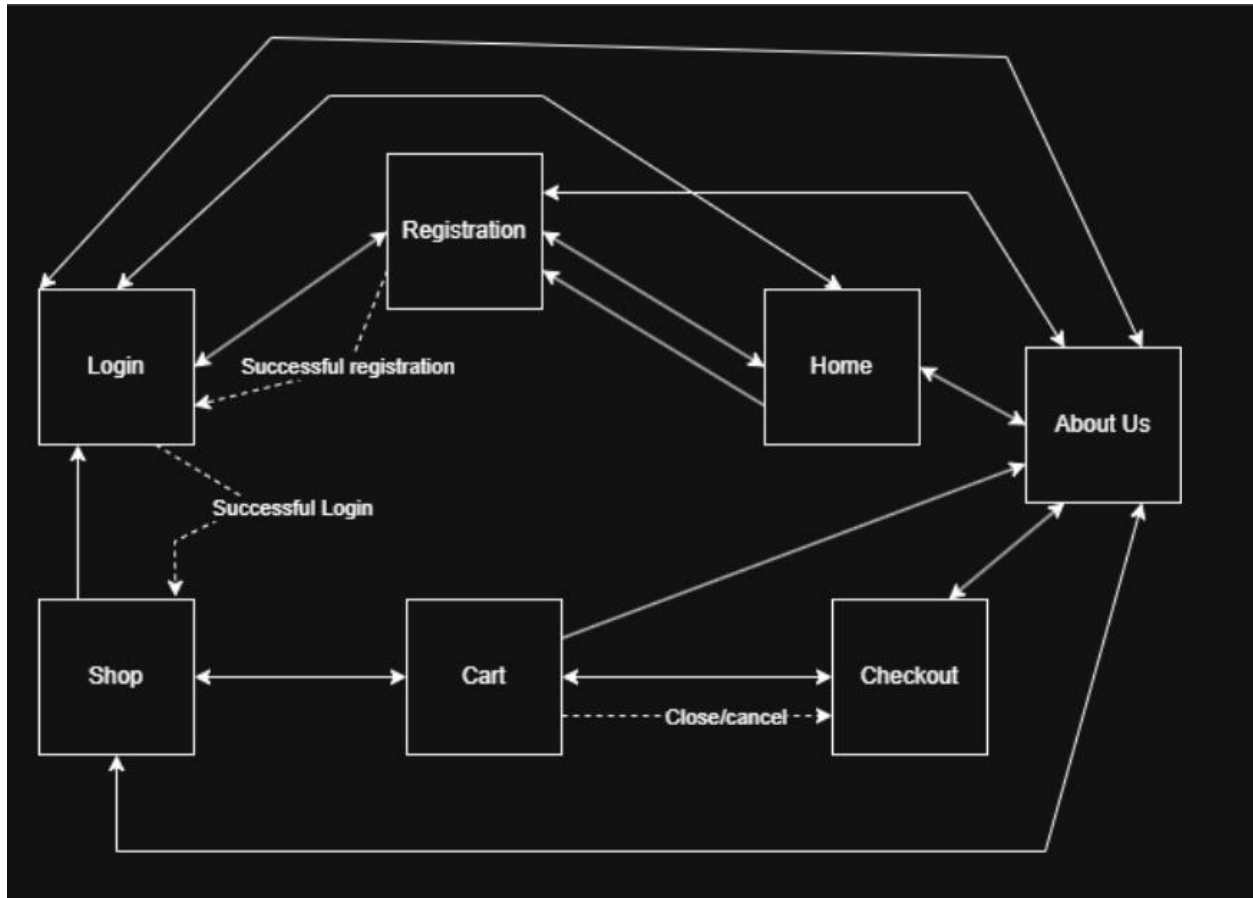

24×24px

Sitemap

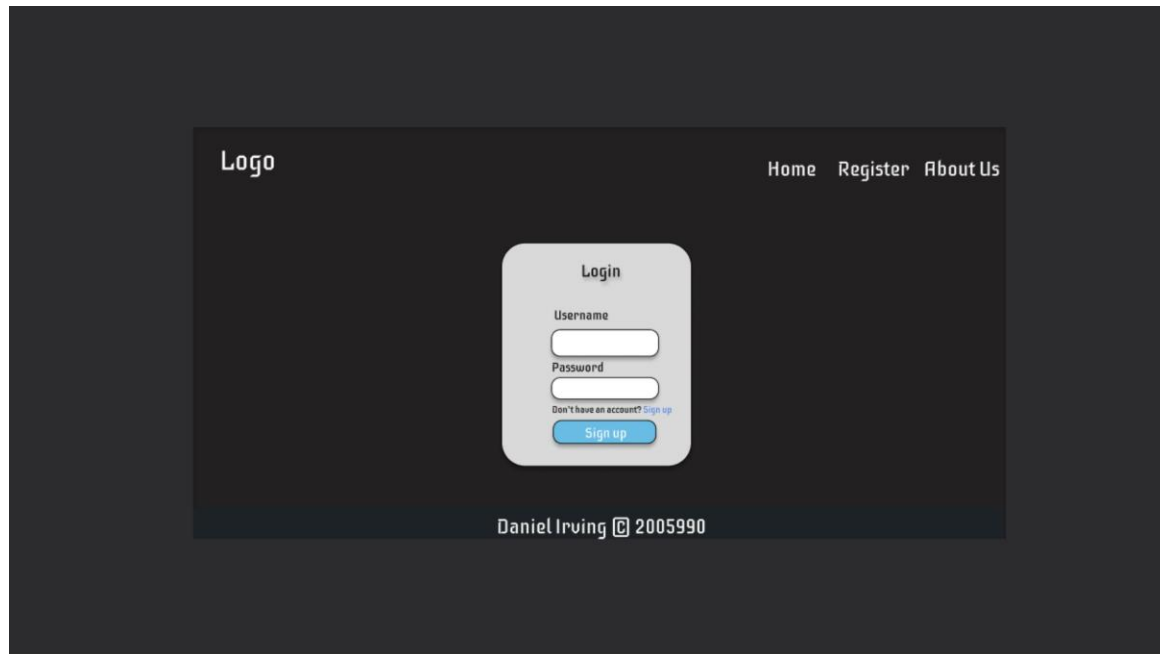

The following pages make up the D Music web application and are interconnected as shown in the sitemap:

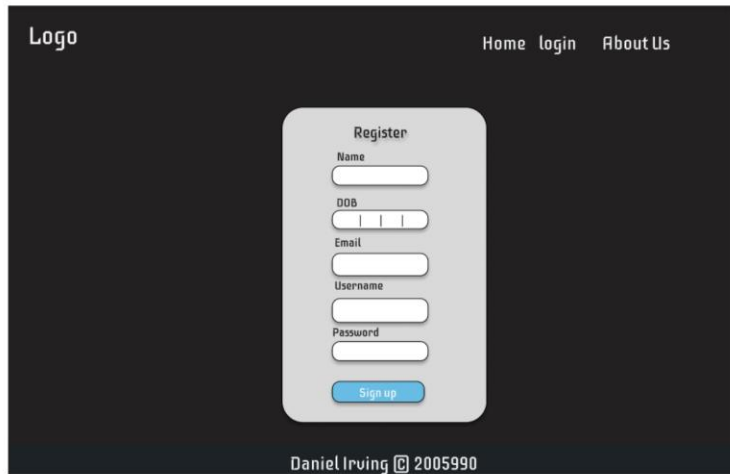

Desktop Layout

The following wireframes show the planned desktop layout for each page of the D Music Store website, as designed in Canva.

Login Page

Registration Page

A registration form titled "Register" is centered on a dark background. The form contains input fields for Name, DOB (with a date picker), Email, Username, and Password. A blue "Sign up" button is at the bottom of the form. The top navigation bar includes "Logo", "Home", "login", and "About Us". The footer displays "Daniel Irving © 2005990".

About Us page

Mobile Layout

The following wireframes show how each page adapts to mobile screen sizes, with the navigation stacking vertically and content reflow to a single column.

User-Defined Functions

Function	Description	Creator
displayProducts()	Iterates the Products array and injects an HTML product card (image, name, price, description, Add-to-Cart button) into #product-list on the Shop page.	Daniel Irving
getCart()	Reads and returns the cart array from localStorage. Returns an empty array if no cart key exists.	Daniel Irving
saveCart(cart)	Accepts a cart array and serialize it to localStorage under key 'cart', persisting all cart changes between page navigations.	Daniel Irving
addToCart(id)	Finds the product by id. Increments quantity if already in cart; otherwise pushes a new entry with quantity 1. Calls saveCart() to persist.	Daniel Irving
renderCart()	Reads the cart from localStorage and rebuilds the cart table in Cart.html. Shows empty-state message when cart is empty.	Daniel Irving
removeFromCart(id)	Filters cart to exclude the matching id, saves the updated array, and calls renderCart() to refresh without a page reload.	Daniel Irving
updateQty(id, delta)	Adjusts cart item quantity by delta (+1/-1). Removes the item if quantity reaches zero. Saves and re-renders after every change.	Daniel Irving

confirmOrder()	Validates name, address, and payment fields are filled and amount $\geq$ totalCost. On success shows an alert with order total and change due.	Daniel Irving
cancelOrder()	Prompts user to confirm cancellation, then redirects to Cart.html without modifying cart data.	Daniel Irving
clearAll()	After confirmation, removes 'cart' from localStorage, resets the cart array, re-renders empty summary, and clears all shipping fields.	Daniel Irving
checkout()	Full checkout: validates shipping & payment, clears cart, shows a thank-you alert with delivery address, redirects to index.html.	Daniel Irving
closePage()	Navigates back to Cart.html; lets the user review their cart without cancelling the order.	Daniel Irving
clearErrors()	Clears all five inline error elements (name, dob, email, username, password) before each validation pass to prevent stale messages.	Daniel Irving
submit listener (Reg)	Prevents default, validates all fields (name, DOB, email regex, username, password ≥ 6 chars), saves user to localStorage, redirects to Login.	Daniel Irving
submit listener (Log)	Prevents default, looks up username in localStorage, compares password, saves session key 'user' on match, redirects to Shop.	Daniel Irving
input listener (amount)	Fires on every keystroke in the payment field. Shows green change due when sufficient, red shortfall when insufficient.	Daniel Irving
